

Achieve Up to 90% Reconciliation Accuracy in 12 Weeks

With HighRadius' Autonomous Accounting Software, your teams are able to automatically reconcile data sets, identify anomalies faster, and improve compliance – **not in months, but weeks!**

Faster and Accurate Accurate Reconciliation

Improve reconciliation accuracy by up to 90%

Leverage out-of-the-box matching rule system to analyze large volumes of data with accuracy, thereby reducing reporting errors.

Faster identification and resolution of anomalies

Detect anomalies in real time and take proactive steps to address the issue rather than waiting for the month-end reconciliation process.

Improve compliance and risk management

Accurate reconciliation, anomaly detection, and reconciliation templates for substantiation ensure good compliance management by identifying potential risks in real-time.

No disruption to the existing IT landscape

Easily plug and play into ERPs with real-time API and/or Hex (SFTP) integrations, and get started with AI-powered account reconciliation.

Reduce reconciliation assignment time by 80%

Reconciliation checklists for analysts to act on, easy tracking of all reconciliation tasks in one place, and the ability to attach external evidence for audits reduces the total time it takes for reconciliation.

Minimal IT dependency

Pre-packaged modules, industry-specific best practices, and remote deployment allow customers to minimize the need for internal IT involvement.

Trusted by Accounting Teams Across the Globe

Solution Architecture That's Autonomous

HighRadius Account Reconciliation Software employs artificial intelligence to auto-reconcile data sets using a set of pre-existing matching rules or algorithms to reconcile any two sets of data. It provides a workspace for review and approval, giving all stakeholders across the organization visibility into the status of reconciliation, dependencies, delays, and any actions that must be taken. Eventually, a comprehensive report is generated with all reconciled tasks. Once a reconciliation task is marked as complete, the system automatically posts the journal entry into the ERP, thereby completing the entire loop of reconciliation.

Key Product Features

Reconciliation Checklist

Automated list of all Balance Sheet GL accounts to be reconciled for a month enabling easy task assignment for all R2R analysts.

AI-Powered Auto Reconciliation

Set of existing matching rules or algorithms to reconcile any two sets of data (GL and Subledger (SL) or GL and Bank statement).

Reconciliation Templates With LiveCube

Using LiveCube Stack configuration, accountants can create multiple GL account-specific templates enabling faster reconciliation.

Collaborative Workspace for Review and Approval

Allow reconcilers to share their work papers for each reconciliation for review and to provide inputs to complete the reconciliation.

Journal Entry Management

Accountants can create journal entries to take corrective action for any discrepancies in reconciliation using pre-configured Excel templates, which will be automatically posted to ERP.

Seamless Connectivity with ERPs, Banks & Other Financial Systems

Bank Integration

Out-of-the-Box Support for Standard Banking Formats: Supports industry-standard bank file formats (BAI, MT940, MT942) and provides real-time insights into which bank statements have been received and processed.

Low-Volume Bank File Import: CSV and Excel file formats can be uploaded from banks if online integration is not required, for example, due to low monthly activity within an account.

ERP Integration

Out-of-the-Box Integration: HighRadius Extractor (HEX) add-on supports all major ERPs such as SAP ECC, SAP s/4 Hana, Oracle NetSuite.

SFTP & API Integration: Supports SFTP and API integration for Quickbooks, Sage Intacct, and Microsoft Business Central.

Low-Volume ERP Data Import: Supports Excel, and CSV formats to pull account reconciliation for modeling.

Other Financial System Integration

Excel and CSV Support: Account reconciliation datasets like GL balances, GL line items, all AP and AR, legal entities, and bank statements can be downloaded and uploaded in our account reconciliation software through simple CSV and Excel uploads.

Keep Your Data Confidential and Safe

HighRadius' Account Reconciliation Software has all the necessary compliances and accreditations required to keep your data confidential and safe.

- Compliance with industry standards and regulations, including GDPR, HIPAA, SOC 1 Type 2, SOC 2 Type 2
- Comprehensive InfoSec reviews from multiple banks and over 500+ corporate customers
- Encryption of data at rest and in transit, ensuring data privacy and security
- Role-based access controls to ensure authorized access to data

An Onboarding Program Designed For a Quick ROI

Our onboarding program includes 5 tasks prioritized as per your organization's goals in each phase that gets completed in 12 weeks.

Lightning-Fast Implementation with ROI in 3 Months

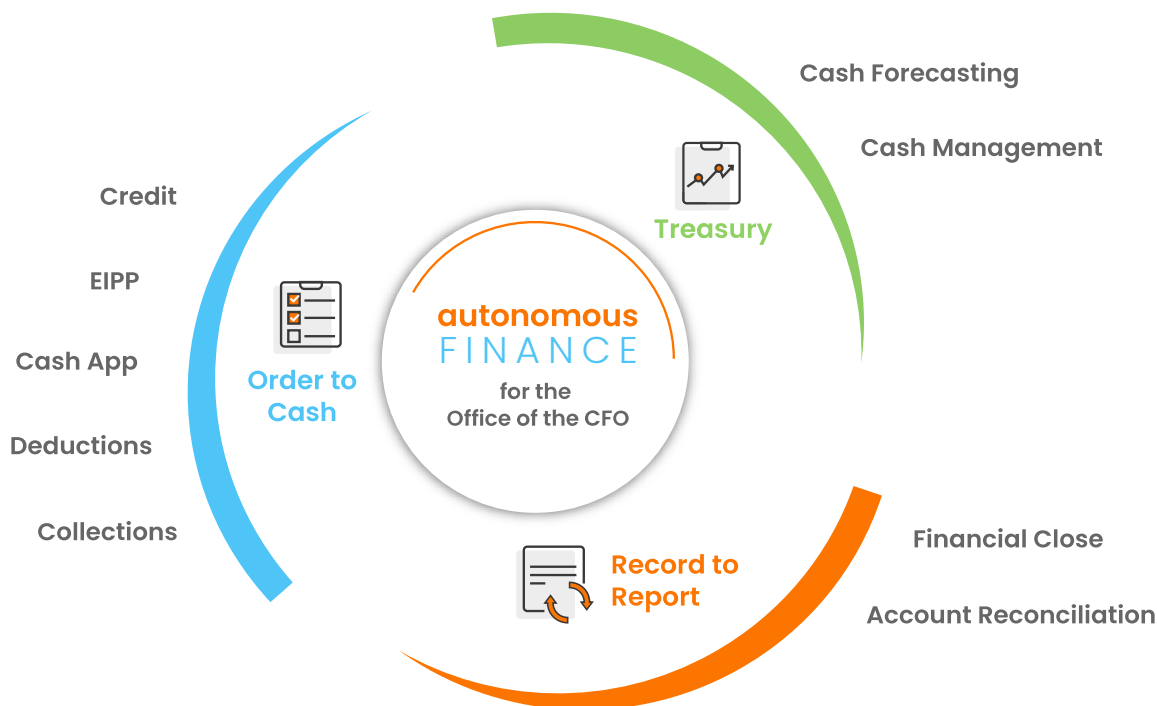

With HighRadius, you can do account reconciliation efficiently in 6 months.

Achieve Up to 90% Reconciliation Accuracy in 12 Weeks

Don't settle for the ordinary. Discover the extraordinary with HighRadius.
